Installing MacBook Core Duo Hard Drive

Tools used in this guide

- [Coin](#)
- [Phillips #00 Screwdriver](#)

Step 1 - Battery

- Use a coin to rotate the battery-locking screw 90 degrees clockwise.

Step 2

- Lift the battery out of the computer.

Step 3 - Memory Cover

- Remove the three evenly-spaced Phillips screws from along the rear wall of the battery compartment.
- The screws are captive to the metal memory cover.

Step 4

- Lift up on L-shaped memory cover, slide it to the right, and lift it out of the computer.

Step 5 - Hard Drive

- Grasp the white plastic tab attached to the hard drive and pull it to the right, removing the hard drive from the computer.
- The hard drive goes back into its compartment with the label facing down.
